KIMYA ABS-ESD 3D FILAMENT
ESD ABS additive manufacturing filament

■ DESCRIPTION

Kimya ABS-ESD is a 3D printing filament made from ABS (Acrylonitrile Butadiene Styrene) with added ESD (Electrostatic Discharge) protection. As part of the styrenic polymer family, it combines the mechanical strength and rigidity of standard ABS with the ability to safely dissipate static electricity. This makes it particularly useful for sensitive electronic applications. Kimya ABS-ESD is lightweight, impact-resistant, and easy to print, offering a reliable solution for functional parts where electrostatic protection is essential.

■ BENEFITS

• ESD Protection.
• Strong Yet Lightweight.
• Impact Resistant.
