KIMYA ABS-S 3D FILAMENT

Low-cost filament for FFF 3D Printers

DESCRIPTION

Kimya ABS-S is a 3D printing filament made from ABS (Acrylonitrile Butadiene Styrene), a thermoplastic polymer from the styrenic family. Known for its high impact resistance, rigidity, and low weight, ABS-S is particularly valued for its excellent surface finish and ease of coloring. These properties make it a preferred material for aesthetic, visible parts. Kimya ABS-S is commonly used for outer casings in domestic appliances, telephony, IT equipment, and toys, offering a balance of strength and visual appeal.

BENEFITS

- Rigid.
- Lightweight.
- Colorable.
