

# KIMYA PA6-CO 3D FILAMENT

## Nylon 6 copolymer additive manufacturing filament

### DESCRIPTION

Kimya PA6-CO is a 3D printing filament made from a Nylon 6-based copolymer. This unfilled polyamide stands out for its excellent tensile strength, low warping, and ease of use—even on open-chamber printers. Unlike many other nylon filaments, PA6-CO combines strong mechanical, chemical, and heat resistance with user-friendly printability, making it an ideal standard polyamide for functional parts and industrial applications. As with all polyamides, the filament should be dried before printing to ensure optimal results.

### BENEFITS

- Strong and Reliable.
- Low Warping Behavior.
- Chemical and Heat Resistant.
