A 575/ A 575 RC Polyester shrink tape

DESCRIPTION

A 575 high shrink tape is a flexible polyester tape. Ideal for mandrel wrapping aircraft tubular parts, golf shafts, tennis rackets, fishing rods, etc.

A 575 RC is coated with a non-silicone release agent for direct release. This eliminates the need for release films or release fabrics used under A 575. The release coating is on the outer surface of the tape roll.
A 575 and A 575 RC are available with the P3 perforation for evacuation of volatiles.
