EADP/EADPI
Air Duster Plus

EADP and EADPI are non-flammable products designed for the safe removal of dust and airborne contamination from very delicate or inaccessible areas of electrical and electronic equipment. They are high-powered versions of the standard range; EADP is the high powered version of EAD. For hard to reach areas, EADPI is a high-powered invertible airduster, which is particularly useful for very intricate equipment or items which cannot be moved for cleaning or maintenance.

- Ultra high power, inert, pure compressed gas for dust removal
- High pressure blast for removing stubborn deposits
- High power (EADP) or high power invertible (EADPI) versions available
- Non-flammable propellant

Typical Properties

Colour	Colourless
Flash Point (˚C)	None
Boiling Point (˚C)	-26.2
GWP (vs. CO_2, 100yr ITH)	< 1

Description	Packaging	Order Code	Shelf Life
High Powered Airduster	400ml Aerosol	EADP400D	48 months
High Powered Invertible Airduster	200ml Aerosol	EADPI200D	48 months

Directions for Use

EADP should be used in a vertical position or at an angle of not greater than 60° to the vertical otherwise a freezing effect will result. If it is necessary to tilt the aerosol more than this, use the invertible version, EADPI.

Caution: Do not use EADP/EADPI for prolonged blasts as the surface of the can will form frost.
