Data Sheet

RESINTRAK

Resin flow line

DESCRIPTION

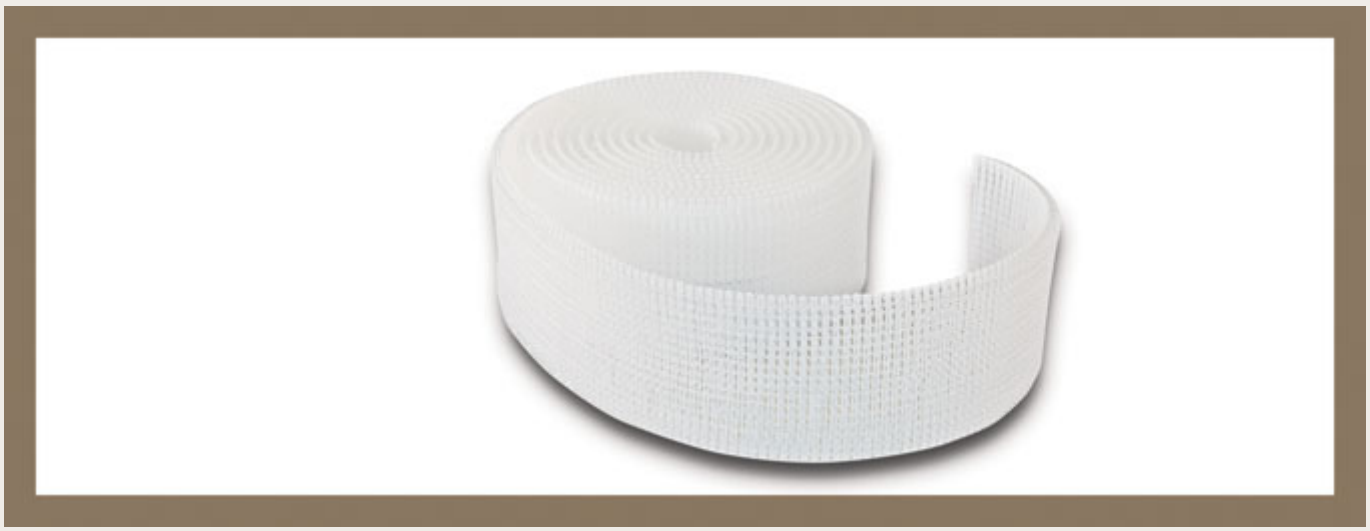

The Resintrak is a knitted technical tape designed to be used during the resin infusion process as resin flow line. This product is composed of a very specific 100% polyester knitting which offers a very high resin permeability and will transport resin along the surface and into the part. The Resintrak leaves no mark off on the part when used in conjunction with Airtech's flow media and release ply.
This product is also available with our double sided adhesive tape Airhold 10 CBS mounted on one side. In this case, the product is called Vactrak and is used as vacuum manifold during the resin infusion process.

TECHNICAL DATA

Material type	Polyester
Colour	White
Configuration of net	Knitted

SIZES

Thickness	Width	Length
3 mm	43 mm	25 m

NOTES

The Resintrak can easily be cut to size and is very convenient in use.
